The screenshot displays the Multiplanos website interface for Barcelona. At the top, the navigation bar includes the breadcrumb "Indice > Plano Callejero > BARCELONA > Mapa", a language selector set to "+7", and a "Descarga version instalable" link. The main header features the website name "www.multiplanos.com" and the title "BARCELONA CIUTAT - BCN".

On the left side, there is a search sidebar with a "Calles" tab, a search input field, and a "BUSCAR" button. Below the search field is a scrollable list of neighborhood names: Abadesa, Abaixadors, Abat Odó, Abat Samso, Abat Sanfont, Abd El Kader, Abdo Terradas, Acacies, Les, Acer, El, Açores, Adrali, and Afores.

The central area contains a detailed street map of Barcelona. At the bottom of the map, there is a control bar with several icons: a green diamond for "centrar plano", an eye icon for "infomacion", a blue plus sign for zooming in, and a printer icon for "IMPRIMIR". A scale bar below the map shows distances of 25, 50, 75, and 100 units.
